It has a long and thin neck with a beautiful crest on head. It has very gracefull walk. I like it very much because of its colorful feathers specially when the peacock spread its feathers like a fan. Seems the most beautiful sight of the world. The peacock takes grain and small insects as its food. It also eats small types of snakes. When the peacock spreads its feathers in rainy season and dances, give us the supernatural feeling of beauty, perhaps for this reason peacock gets the honour of being National bird of India.
